CONTENTS

Moore Speed Racing are proud to be a sponsor of the British supersport racer Ross Walter and wish him all the best for 2009. We also extend a big thank you to the Interserve racing team and Nevis Marketing.

All parts supplied, can be fitted in our fully equipped workshop by one of our professional technicians. From exhausts to service kits, power commanders to indicators if you haven't got the time or the tools let us take care of the job for you. You can be reassured that your new parts will be fitted properly, ensuring safe and optimum operation of your machine.

Standard workshop fee may apply.

Exhausts. We can supply exhausts from all the leading manufacturers for Road or Race applications. Increased performance & style for most makes of motorcycle. From end cans to full systems

This brochure is a mere glimpse into the extensive range of products and performance mods we supply. If you can't see what you require, give us a call or pop into our showroom. We'll be more than happy to help you with your enquiry.

Akrapovic continue to dominate as world leader for exhaust system technology. Their products constantly evolve through experience gained from partnerships with factory teams in Moto GP, Superbike, Supersport, Supermoto, Motocross, Enduro and Rally Raid.

The Akrapovic philosophy is to be the best and to constantly innovate, their R&D department and skilled craftsmen are always striving for perfection. Their use of exotic materials like carbon-fibre, titanium, stainless steel and inconel, coupled with investment in industry leading manufacturing techniques such as tube extrusion, CNC bending, and hydro-forming ensure that all Akrapovic products live up to the quality expected and demanded at the highest level.

Akrapovic produce a full range of exhausts to suit many different uses & applications with the following features & benefits:

Healthy horsepower increases – without the need to re-jet/re-map.

Significantly reduced weight over standard.

Exquisite build quality ensuring easy installation and durability/longevity

F.I.M / EC approved noise levels with a "quality" sound.

Championship winning technology / brand image.

Spare parts availability to maintain and protect your investment.

There are five main lines in the Akrapovic range.

Bolt On line- Replacement Muffler

Slip On Line- Replacement Muffler

Racing Line- Stainless full system

Evolution Line- Titanium full System

Sp Series- Stock Replacement muffler

EVOLUTION LINE SYSTEM

The flagship of the Akrapovic exhaust system range, used and tested by top factory teams in motorsport racing. It is simply the finest exhaust system available. Maximizes the performance while reducing overall weight for optimized handling of the whole motorcycle. It is made entirely of titanium. Muffler outer available in carbon. Street legal versions available.

Prices from

£750

RACING LINE SYSTEM

Complete high-quality stainless steel exhaust system precision made from conical tubes. Maximum output while significantly reducing overall weight. Top performance in everyday riding or even in most demanding races. Carbon muffler sleeve optional.

Prices from

£650

Underseat exhaust systems available for many different models.

Prices from

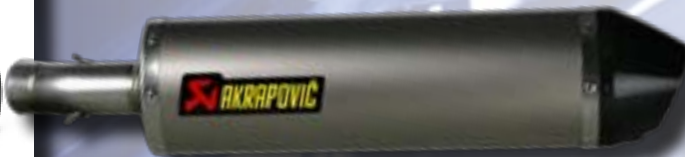

£700

Underseat slip on kit on Yamaha FZ6

Carbon Capped slip on

BOLT ON & SLIP ON LINE

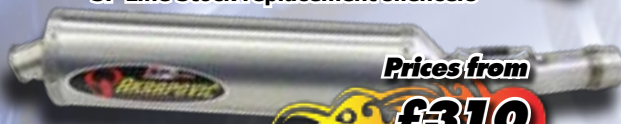

The Akrapovic Slip-on and bolt on line represents the first step in exhaust system tuning. It is simple to install and replaces a stock muffler. The best compromise between price and performance. More power, more torque and less weight, which all reflects in a smoother ride.

Prices from

£390

SP Line Stock replacement silencers

Prices from

£310

SP LINE

The Akrapovic SP range is a direct replacement for stock mufflers. Offering the same features as the bolt on and slip on range. Improves performance with more power, more torque and less weight at an affordable price.

FOR MODEL AND FITMENT OPTIONS

01202 746 141

With the development and construction of high quality exhaust systems meeting the highest requirements, REMUS has established itself as one of the market leaders of sport exhaust systems. Ultra modern research and production facilities as well as brand new state-of-the-art technologies are the determining factors behind the leading position of REMUS on the world market.

They produce an extensive range of bolt on cans, slip on cans and full systems that cover virtually all the leading makes and models of motorcycles. A choice of Titanium, aluminium, stainless and carbon fibre outers with various finishes give a wide choice of styles to suit any tastes.

All road legal cans can be transformed into a full noise racing silencer by removing the sound-insert.

POWERCONE

Removable sound insert
for all road legal cans

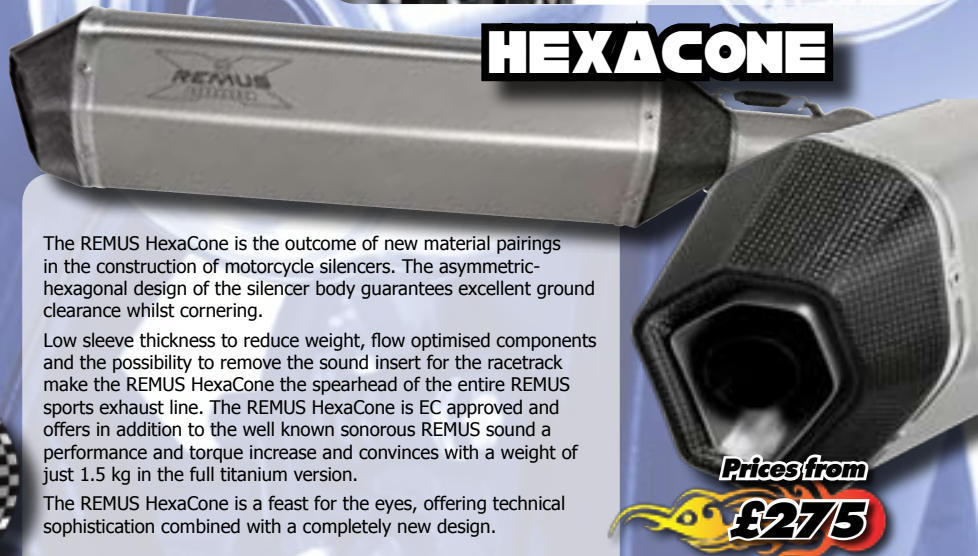

Prices from

£215

The REMUS PowerCone with its aggressive Moto GP look is a true winner in style. Alternatively available with a titanium or a stainless steel sleeve. The PowerCone increases engine torque output even further, which leads to an increase of the maximum performance.

For the race track, the PowerCone can be converted into a full noise racing silencer by removing the sound-insert. It is possible to revert the PowerCone back to an EEC approved silencer at any time. maximum performance and the typical powerful REMUS sound. The PowerCone is a "must have" for any rider who wants to improve the racing look of their streetbike even further.

HEXACONE

The REMUS HexaCone is the outcome of new material pairings in the construction of motorcycle silencers. The asymmetric-hexagonal design of the silencer body guarantees excellent ground clearance whilst cornering.

Low sleeve thickness to reduce weight, flow optimised components and the possibility to remove the sound insert for the racetrack make the REMUS HexaCone the spearhead of the entire REMUS sports exhaust line. The REMUS HexaCone is EC approved and offers in addition to the well known sonorous REMUS sound a performance and torque increase and convinces with a weight of just 1.5 kg in the full titanium version.

The REMUS HexaCone is a feast for the eyes, offering technical sophistication combined with a completely new design.

Prices from

£275

REVOLUTION

Prices from
£235

THE original exclusive EEC approved sport silencer for many motorcycle applications. This silencer has a weight, depending on the chosen model of around 2.5kg. The removal of the riveted sound tube enhances a further performance increase throughout the entire engine range for race track usage. It doesn't make any difference whether the stainless steel exhausts are provided with outer jacket made of titanium, aluminium or carbon, the REMUS Revolution is utterly the enhancement of any evolution – an exclusive exhaust for exclusive motorcycles.

REVOLUTION GP

Prices from
£215

The EEC approved Revolution GP weighs about 2.2kg depending on sleeve material. This silencer offers shattering sound and a noticeable power and torque increase throughout the entire engine range. For those who need extra power on the race track, the removal of the riveted sound tube transforms the Revolution GP into a full on, full noise, straight through racing silencer. The compact designed, high quality stainless steel silencer is available in three different sleeve materials: aluminium, carbon or titanium and is now available for many different motorcycle applications.

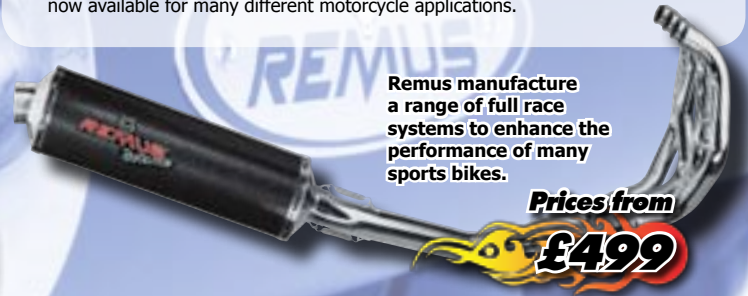

INNOVATION

Prices from
£225

The REMUS Innovation belongs to the first innovations of the exhaust experts of REMUS - hence the very name. The silencer with its stainless steel interior is available with an aluminum, titanium or carbon sleeve. In addition to the racing version the silencer can also be delivered in a road legal version for numerous bikes.

The REMUS Innovation is truly convincing because of its muscular look, the famous sonorous REMUS sound plus the performance gain throughout the entire engine speed range.

Remus manufacture a range of full race systems to enhance the performance of many sports bikes.

Prices from
£499

Blue Flame Exhausts are designed with performance and sound at the forefront of their ongoing research and development.

They produce cutting edge, high performance motorcycle exhausts out of the very finest materials and have the ability to manufacture all of the constituent components in house.

All Blue Flame products have the unique 'Blue Flame road legal baffle system'. The baffle is removable, transforming the can into a full noise race can. The range includes a choice of stainless, titanium or carbon sleeved end cans with single or dual outlets, to full systems that include headers made from stainless steel or titanium. The cans come in three different styles, the EVO oval or the three sided tri oval EVO 3 and the MOT GP round. Carbon end covers are also available to add extra style. Titanium cans come with a choice of plain or coloured finish.

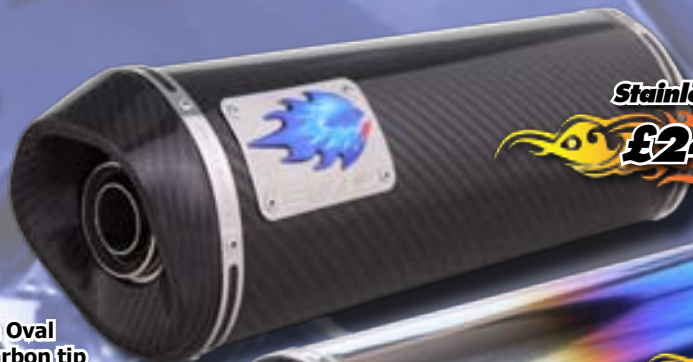

Different can lengths are available

- 400mm (standard)
- 350mm
- 300mm
- 250mm (stunt)

devil

DEVIL has been developing, producing and marketing exhausts for bikes, since 1966. From then to the present day, DEVIL has invested in men and technologies always keeping quality and performance in mind. DEVIL prioritizes the race track for testing its range of exhausts, competing in national and international championships races, with several victories. This has enabled DEVIL to bring the latest technologies and design features to the rider.

Producing a range of road legal and race only cans in the usual choice materials, Carbon fibre, titanium and stainless. For ultimate performance on the race track DEVIL produce a full titanium system with carbon bodied exhaust.

Prices from

£350

MASTER

MASTER offers a good mix of performance and boasts compact dimensions (size varies from 360 to 420mm depending on different motorcycle type or model application). This silencer's body is designed in an oval shape and is available in matte carbon or shiny stainless steel sleeves.

ROCKET

ROCKET silencer has the same design scheme as MASTER, but is technically different due to each engine's requirements. Its inner volume fits single silencer sport bikes or large engine models, providing strong performance upgrades and the deep tones expected.

ROCKET is only available in matte carbon or shiny stainless steel sleeve.

Prices from

£350

Prices from

£200

Full Systems from

RUNNER off road

RUNNER silencer offers a large application range, showcasing the best of DEVIL technology. The benefits of RUNNER will spare weight and increase deep tones on street supermotos and off road bikes. A sleek oval design makes the RUNNER a "race-like" silencer. This model is available in matte carbon or brushed stainless steel

RACER

Characterized by a round shape, this silencer has very compact dimensions, a 108mm diameter and 420mm length.

The RACER offers the best price-to-performance ratio and provides the deepest DEVIL tone, close to racing systems. Most 90's model sport bikes can benefit from the DEVIL RACERS design.

Prices from

£220

MAGNUM

From competition racing to everyday street riding. Characterized by an oval shape and classical design, Magnum comes with a removable baffle to adhere to the road noise level requirements. With the baffle removed, MAGNUM will show you its racing roots by offering the signature deep DEVIL tone, and increased power performance. MAGNUM silencer is available with carbon, stainless steel or titanium sleeves.

TROPHY

The TROPHY silencer is the perfect mix of classical design and modern technical solutions. A round body equipped with a removable baffle. Free of the Db-killer the TROPHY will please any one's ears by providing a deep rumbling tone. TROPHY is available with carbon or shiny stainless Steel sleeves.

RACING REPLICA

RACING REPLICA is Devil's racing top-scale product, built for competitive use. Born in 2006, Racing Replica introduced the new design trend exhibiting the fibreglass end cover. This product range comes from the result of DEVILS knowledge and technology, enabling silencers to receive specific carbon sleeves which are resistant to even the most extreme conditions. The Silencer's structure with end cap connector is built entirely out of titanium, just like the mid pipes and headers. The pipe connectors are titanium CNC machined rings. This material has been engineered to fulfil the maintenance requirement of competition, perfect fitting and quick removal systems.

Contrary to the name, this system is not a replica, it is real racing parts, as used by champion race teams on the professional circuit.

Yoshimura, a name associated with the very best in motorcycle sports. Founded way back in 1954 by Hideo Yoshimura, or "Pops", as he was known. The company slowly grew and expanded making its mark during the 70's at legendary race tracks such as Daytona and Loudon.

During the late 70's and early 80's Fujio Yoshimura son to "Pops" took over running the ever expanding company and through his creative foresight and innovative design helped Yoshimura R&D of America Inc. to become a leader in the art and science of sportbike performance technology.

When Pops decided to retire, Fujio headed back home to run Yoshimura Japan. In his place, Suehiro Watanabe, or "Nabe", became the head of Yoshimura R&D of America. Nabe was not only an accomplished mechanic but he had an intuitive understanding of the manufacturing process. He has developed many new manufacturing techniques, which have helped put Yoshimura at the forefront of the aftermarket exhaust industry.

Today they are producing some of the very best race and road systems available. The quality and performance stands out ahead of the rest in the market and on the race track. They have become the largest sport bike aftermarket pipe manufacturer in the world. They ship out thousands of pipes each month to customers all around the world. The reputation of Yoshimura has driven sales to the point where they are the industry leader.

Homologated or Race-Sound end cans, sports systems, and OEM replacement exhausts

Style: LASER exhausts are available in various styles (carbon fibre, titanium and stainless steel) and are recognizable by the high quality finishing and distinctive designs

Performance: LASER exhausts are built to perform. Each exhaust is extensively tested before being taken into production. Only the best pass the test!

Sound: LASER is well known for its deeptone sound. From custom to super sports exhaust LASER offers sounds from homologated deeptone up to racing level.

Weight: LASER exhaust are built with the lightest and strongest materials available so a LASER exhaust weighs much less than an original exhaust. Replacing your original exhaust by a LASER is the fastest way to lose weight on your motorcycle.

Quality: Only the highest quality materials are used for the production of a LASER exhaust. The product has to go through various levels of quality control before being sold. This means that with a LASER you are sure to have a top quality product!

STEALTH

The direct result of the latest technology in computer designing and sound engineering. The racing technology is the basis for this muffler and translated into street use with a lightweight Stealth muffler.

The following benefits are typical for the Laser Stealth:

- * Outstanding design
- * Optimum performance
- * Light weight
- * High tech materials
- * Finest sound

The full carbon muffler is completely heat resistance and tested in the World Superbike series.

X-TREME

LASER X-treme is one of the most popular exhausts in the LASER program. Specially adapted to today's standards on performance, sound and design.

Full flexibility in sound thanks to 'Dual Sound' Technology capabilities. By replacing the inserts you can choose between an officially homologated or real sportive sound level without compromising your performance. These inserts are not visible when installed!

Above all the X-treme is a designers exhaust which instantly gives the motor-cycle a personal touch. The full stainless steel X-treme exhausts are available in various styles, from the 'bullet like' (tapered) version to the GP-Style 'specials'.

Prices from

£400

HOTCAM

No.1 performance exhaust!

The direct result from years of racing experience. The racing technology is translated into street use with the lightweight HotCam muffler. Maximum ground clearance and a real 'deeptone' sound thanks to the unique "cam" shaped design.

Prices from

£400

DUO-TECH

A revolution in exhaust technology!

The LASER Duo-Tech is fully adapted to today's sound regulations and standards. The concept of the Duo-Tech is based on exchangeable inserts. These inserts have a specific effect on the sound level of the exhausts. You can choose between a homologated sound level or a real sportive deeptone sound.

The LASER Duo-Tech is available in carbon fiber, titanium and Stainless for a wide number of motorcycle types.

Thanks to the specially designed construction the LASER Duo-Tech provides optimal performance in any configuration and is highly durable. Very suitable for powerful two cylinder engines!

Prices from
£300

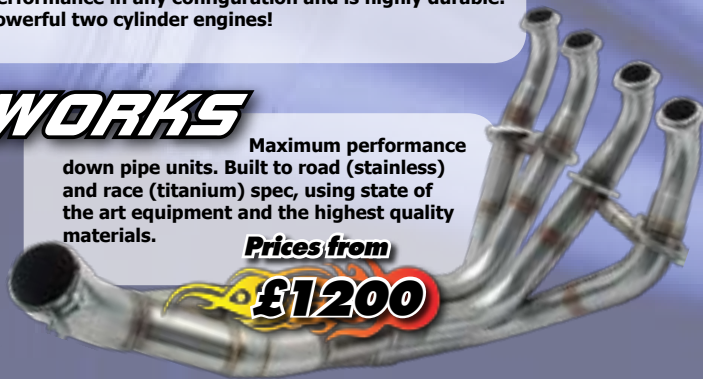

WORKS

Maximum performance down pipe units. Built to road (stainless) and race (titanium) spec, using state of the art equipment and the highest quality materials.

Prices from

£1200

Leo Vince SBK exhaust systems provide substantial weight savings, increased horsepower and are engineered to run at peak efficiency with stock jetting or fuel injection settings. Every system utilizes a specific geometric format for each engine to ensure maximum performance

Factory Systems: SBK Factory exhaust systems are the top street systems available from LeoVince. They are constructed with a TIG-welded stainless steel AISI 304 mid-pipe leading to an all-titanium or carbon canister with a carbon fiber end cap and mounting strap providing significant weight savings. They are designed to increase horsepower and run at peak efficiency with stock jetting or fuel injection settings.

Oval Systems: SBK Oval exhaust systems are powerful, durable and most importantly affordable, providing significant weight savings and increased horsepower. They are designed to run at peak efficiency with stock jetting or fuel injection settings.

GP Pro Systems: SBK GP PRO exhausts boost power with a uniquely curved GP exhaust look and sound. Each of these handmade exhausts is designed to run with stock jetting or fuel injection settings. The lightweight system also features an EVO II removable baffle to adjust sound level.

SBK full systems provide a fully-optimized header and canister design. They offer substantial weight savings, increased horsepower and are engineered to run at peak efficiency with stock jetting or fuel injection settings. Canisters are available in titanium, or carbon fiber.

ZARD are rapidly becoming a major manufacture of quality exhausts. They held a presence in the WSBK in 2008. ZARD now produce all the OEM exhausts for Bimota and a good proportion of the MOTO MORINI range.

ZARD, developed and staffed by a seasoned and talented group of engineers headed by Walter Amiste, Head of Design & Engineering.

Walter formerly worked with Termignoni, has over 15 years of experience designing systems and working with the Ducati Corsa group.

ZARD offer incredible looking systems that feature exceptional finish, attention to detail and innovative design. They are also noteworthy in that they perform exceptionally well with the OEM ECU.

The Ducati systems offered have a great exhaust note measuring 102db.

As with all the other leading manufacturers ZARD use only the finest materials for construction. Using Titanium, Carbon fibre and Stainless Steel ensures that Zard exhaust are made out of the strongest and lightest materials.

When it comes to premium aftermarket motorcycle exhausts, Two Brothers Racing has everything you need. From silencers that dramatically improve performance to entire exhaust systems that will increase your torque and advance peak power, TBR manufacture the aftermarket accessories that are guaranteed to set your bike apart from the rest. Turn your bike from a boring, standard stock machine into one sweet ride. Choose from slip-ons, flange-on exhaust systems, and full systems to upgrade your bike and increase performance on demand.

TBRs unique exhaust design and build is a true work of art combined with a high end manufacturing technology. The interiors are made from a wound, perforated & corrugated stainless steel core. Lighter than traditional stainless steel cores and even some titanium cores. This combined with a patented CNC billet aluminium inlet and outlet coupling and magnesium endcap, set the Cans in a different league from other manufactures. In style and acoustic tone TBR systems are truly magnificent and a great addition to any bike.

The outer sleeves are available in Carbon Fibre, Polished or Brushed Aluminium and Titanium. The Cans fitments are slip on or flange on (bolt on) depending on the application. Fitting is extremely easy and all parts required are included.

All Two Brothers full Racing systems are created from .035 304 Stainless Steel precision bent via our CNC Mandrel Bender with exacting bend tolerances of .1 degree. All headers are mirror polished for a custom finished look and finished with CNC machined flange collars

ARROW

Arrow Special Parts S.P.A was founded in 1985 when Giorgio Giannelli made real his project to create a company, whose major task was to produce high performance exhaust systems. Through hard work and determination the Arrow brand got the success it deserved, expanding in Worldwide markets and with an impressive series of race success. Stainless steel, carbon fibre and titanium alloy. These are materials Arrow used and are still using today, keeping its quality, design and performance to a high standard.

Race and road research plays an important part in the success of the company. Arrows thorough dedicated research, testing and design coupled with an ability to listen and respond to the requests and demands of engineers and riders, ensures the Arrow brand delivers exactly what the market requires.

A product of passion, designed to perform and built to last, an Arrow Exhaust system is the choice of winners.

The Trophy silencer has become one of the best systems in the Arrow range. Its extraordinary trapezoidal shape and a unique oval gas outlet give a great sound and look. The Trophy has no dB-killer, so these silencers are not available in street legal version, except for the Hornet 600, meeting the noise requirements without a dB-killer. The exhaust is built entirely in stainless steel and assembled with TIG welding.

The Pro-race a MotoGP trumpet-style silencer. An elegant cone shaped silencer with an aggressive bark! As usual, assembling of Pro-Race silencers is made via TIG welding. Pro-Race systems are available in a full titanium version or in a newly introduce stainless steel alloy (Nichrom) and in a racing or street legal (with dB-killer) version

PRO-RACE

The Race-tech is a Diamond shaped silencer giving maximum strength for minimum size. Inner parts of the silencers are made with stainless steel coupled with TIG welding technology. Design of the endcaps and the gas outlet pipes allow outbound gas to flow turbulence-free and reduce counter-pressure negative effects. Available in a Street Legal version for most bikes, equipped with a removable baffle. These silencers are available with sleeves in titanium, carbon fibre or aluminium.

The titanium silencer is available with the all-new rear endcap in carbon fibre.

STREET THUNDER

Prices from

£330

A mix of design and technology, one of the most good looking in the market. A small cut down diamond shaped silencer for aggressive and dynamic styling. Uniquely designed rear endcaps, available in stainless steel or carbon fibre. The reduced size is balanced with top level, sound absorbent and thermal insulating materials. Street Thunder silencers are available in a street legal version with removable dB-killer. And as the "bigger brothers", Street Thunder is available with canisters in titanium, aluminium or carbon fibre.

PRO-RACING

Prices from

£360

With the success of the Trumpet-style silencer customers started asking to fit those silencers onto bigger bikes (the bigger the bike, the higher the noise). So Arrow started thinking to increase the inner volume of the Pro-Race silencer, a Pro-Racing line was born. single cone or two cone-shape sections welded together), thus allowing the guys in the R&D to develop an exhaust which fits almost perfectly to the bike's design. Pro-Racing silencers are made in stainless steel and welded with TIG technology. A street legal version of these silencers is available and, in some cases, a choice between a carbon endcap and a stainless steel endcap is available.

COMPETITION SYSTEMS & HEADERS

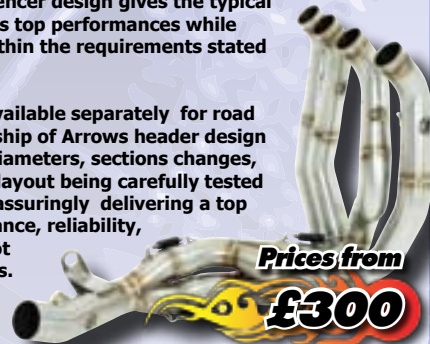

Prices from

£560

Arrow produce complete Competition systems for race tuned motorcycles with headers made from Titanium or Stainless. Through thorough testing and research, each system is designed to give maximum power and performance to

individual bike models. Silencer design gives the typical Arrow look and also ensures top performances while keeping the noise levels within the requirements stated by racing rules.

Header pipe kits are also available separately for road or race use. The craftsmanship of Arrows header design is outstanding with pipes diameters, sections changes, components, welding and layout being carefully tested throughout production. Reassuringly delivering a top product with high performance, reliability, long-lasting and last but not least, good looking qualities.

Raw Titanium Exhausts.

Racefit products are born out of passion- a life times obsession with achieving something that would appear to be impossible.

Minimalist, aesthetics, the essence of Moto Gp - where else could you possibly get such a focused product, unless it was being built specifically as a one- off, bolt-on for your bike - no need for an engineering degree to fit or a development team that works mechanics behind you.

Hand Built exotica - every last detail of this process is the product of laborious, hand made craftsmanship, using:

- full raw titanium construction
- brushed (works) finish
- unpolished welds
- probably the lightest exhaust cans available
- for off road use only

The spiritual home of Racefit is at the track - it's where it starts and ends.

All parts needed for fitting are included.

BODIS
EXHAUST TECHNOLOGY

Bodis produce some stunning architecture when it comes to exhaust design. Producing silencers and full systems from stainless steel, titanium and carbon fibre, with exceptional build, quality and finish.

Bodis oval, tri-oval silencers with slip on or bolt on fitting are designed to give instant performance gains over stock silencers. With the exception of the Bodis race line, most Bodis silencers have removable baffles to meet with noise regulation laws.

Hi-level and under seat exhausts seem to be where Bodis excel in their design skills, producing some very stylish designs indeed.

On the track is another area where Bodis manages to be ahead of the race. Producing full systems, designed to ensure that the engine can deliver optimum power and made from titanium, reducing the overall weight.

The quality of Bodis road and race exhausts is hard if almost impossible to beat and ensures that a Bodis exhaust is an ideal choice for stock replacement.

POWER COMMANDERS

Dynojet UK

NEW
POWER V
COMMANDER

£298

The Dynojet Powercommander III allows you to gain absolute control of your bikes performance. The most advanced tuning tool available today. Available for most bike models.

The Dynojet Power Commander plugs in line with your bike's stock fuel injection system. It uses OEM (original equipment manufacturer) style connectors making installation easy and quick. The PCIII usb allows a full range of fuel adjustment, as much as +/- 100% over stock. Adjustments can be made either with a Windows based computer or by using the face plate mounted button adjusters. No permanent changes are made to the bike's system. Once the unit is removed the bike reverts to its stock settings.

**Works with any exhaust
+/- 100% fuel adjustability over stock**

Expandable with:

**Ignition Module
Quick Shifter
Color LCD display
Multi-Function Hub**

Easy installation (no cutting or splicing)

£240

The additional LCD Display with touch screen navigation connects to any Power Commander USB (some BMW models excluded) via a "quick disconnect" cable. It is designed to remain on the bike and is weather resistant. While connected, the unit will display all available data from the Power Commander.

Multiple maps can be stored in the unit (requires optional SD memory card, not included). These maps can be sent to the Power Commander "on the fly." Additionally, maps can be adjusted using the controls on the display.

£245

The Dynojet Quick Shifter (DQS) allows full throttle, clutch less shifting. This is done by momentarily cutting the fuel and or ignition, which unloads the transmission. During this time, the rider can shift up to the next gear without rolling off the throttle or using the clutch.

The PCIIIUSB incorporates all of the Quick Shifter functionality in with the main fuel controller and is fully programmable

£312

Reduced size (less than half of the size of PCIII) and with more features, sensitivity and adjust ability than ever before. Two position map switching and gear and speed input come as standard.

The new PCV is available for 2009 motorcycles only.

With the additional Autotune kit and its wideband O2 sensor the PCV automatically adjusts the fuel map while riding.

£260

The Ignition Module uses "direct coil driver technology" and allows a high degree of timing adjustment. In the Power commander Control Center Software the user is able to advance or retard the ignition curve up to 10 degrees based on throttle position and RPM. It is also possible to alter the timing for each cylinder individually if necessary.

from £95

The Multi-Function Hubs allow users to access advanced expansion features. Several optional harnesses are available to permit both input and output to/from the module.

Dynojet jet kits are available for a wide range of carbide motorcycles .
Call us for kit options on all other motorcycle makes, models and years.

Dynojet offers a wide range of kits to fit any application. Several types (stages) of kits are available to fit your specific needs. Whether you run a standard motorcycle, or a tuned sportsbike, Dynojet Carburetor Jet Kits can provide you with a simple and affordable solution to all your carburation problems. Dynojet Jet Kits increase power and smoothness throughout the entire rev range, while maintaining optimum fuel economy.

Each Dynojet Jet Kit includes comprehensive instructions which show step-by-step installation and testing procedures to ensure a perfect setup every time. This is backed by free telephone and Internet to Dynojet customers.

AIR FILTERS

K&N POWERSPORTS FILTERS

K&N Engineering is the innovator of this unique cotton air filtration system. The High flow technology is the air filter choice for many racers and riders. It provides increased performance and outstanding protection to the engine.

PRE-OILED

The Historic K&N red colour is from factory pre-oiling to enhance filtration efficiency.

HIGHER FILTRATION

4-6 layers of cotton gauze filter medium flows over 200% more air than paper air filter medium on a square inch by square inch basis.

LARGER SURFACE AREA

Accordian style pleats provide substantially larger filtration area over non-pleated fibres.

MINIMUM SERVICE REQUIRED

Cleanable filter-medium backed by the world's first million-mile manufacturer's warranty.

INCREASED FLOW

Coated aluminium wire exterior for structural support and long filter life.

PERFECT SEAL

High quality urethane or plastisol selected for performance and durability.

K&N air filter service kits.

Kit contains air filter cleaning solution and air filter oil

£10.99

The DNA High performance air filter is a high quality next generation multilayer cotton gauze oil impregnated air filter. The filter media is made of 4 layers of high quality nafta surgical cotton gauze.

The cotton is sandwiched between two layers of epoxy coated Marine grade aluminum wire mesh. The result of the special design and the Hi Tec manufacturing process is a filtration media that has very high flow rates, low restriction, superior dust holding capability, smoothens out the air flow stream and lasts a lifetime.

The oil used to impregnate the cotton is a very special grade produced by one of the world's best Oil Companies. This special oil is a very critical part of the filter and has the capability to produce a static charge to the cotton media and attract the entire dust particles that flow towards the filter, even the very fine ones.

DNA proudly introduce a filter that can last the life of the vehicle. High quality materials, Hi Tec manufacturing process, designs that meet OEM quality levels and very strict quality control, is the secret behind the DNA Air Filters and the factor that allows DNA to give a Lifetime Warranty!

The DNA Air Filter will serve you for many years and needs very little care using the DNA Service kit.

When the filter is dirty simply follow the instructions that you can find in the service kit, allow the filter to dry, re-oil and you are ready to use your filter again, like new!

DNA Air Filter owners do not produce unnecessary waste as paper filter owners have to do every time the life of the paper filter ends.

FORMULA 1 & WORLD SUPERBIKE AIR FILTER TECHNOLOGY FOR THE STREET

•Formula 1, Moto GP and World Superbike Technology

Having won Numerous Championships in Formula 1 and World Superbikes the experience gained on track is transferred to BMC's mass production, using the same technology, materials and manufacturing processes, all of which are second to none.

•Increased horsepower / Improved throttle response

The filtration material is composed of special cotton gauze soaked with low viscosity oil and covered with alloy mesh, which has an epoxy coating to ensure protection from petrol fumes and oxidation due to humidity in the air.

BMC filters guarantee a superior air capacity to that of traditional paper or foam filters, ensuring a minimum loss of power in air flow and therefore obtaining a better performance from the engine.

•Washable / Re-usable

Furthermore the cotton has the advantage of being washable and therefore reusable, so BMC filters represent excellent value for money as they can be used, cleaned and re-used over and over again!

•Superior quality, fit & performance to all other after-market filters

All BMC filters are made from hard ABS plastic in one single piece with no welded joints; this technique gives rigidity, ensuring a perfect seal, easy fitting and avoids splitting or breakage. (Unlike other rubber chassis filters)

•Choice of Road or Race filters

Many sports bikes have the choice of a Road filter designed to increase airflow without upsetting standard fuelling or a Race filter designed to maximise airflow for applications where a jet kit or Power Commander will be used.

Pipercross air filter service kits.
Kit contains air filter cleaning solution
and air filter oil. C9000

£8.99

Pipercross have been making high performance air filters for the motorsport and domestic market for over 25 years. Based in Northampton, England, situated amongst some of the biggest names in motorsport engine design and manufacturing in the world.

Over the last 25 years, Pipercross performance air filters have helped many race teams win major championships on the British, European and World stage. The development work carried out with these teams and constructors have enabled them to produce some of the most technically advanced filters on the market.

Pipercross air filters consistently outperform paper and cotton-gauze rivals to supply air to the engine - even when dirty! This is thanks to the multilaminate construction used in every Pipercross performance air filter. Layers of varying porosity foam all work together to trap different sized particles.

Designed to provide a dramatic increase in airflow over a standard paper air filter whilst still retaining the highest level of engine protection, a Pipercross motorcycle air filter is the last air filter you will need to buy for your bike. Pipercross motorcycle air filters have been repeatedly tested on many different motorcycle configurations and the results speak for themselves. An increase in both power and torque without the need to modify fuelling, all by simply replacing the air filter unit.

Every Pipercross performance air filter is covered by a limited lifetime warranty against manufacturing defects and as Pipercross filters are washable, there is no waste - helping the environment and your wallet!

NGK spark plugs for virtually every Motorcycle, ATV, and Scooter application in the world. Utilizing a wide variety of materials, from standard copper-core type to Iridium, NGK is the world's leader in spark plug engineering and technology.

NGK Spark Plugs are:

- OEM Approved
- Specified by more Motorcycle Manufacturers than any other spark plug company, including Honda, Kawasaki, KTM, Suzuki, and Yamaha,

If you've not got the time or tools, you can get your bike serviced at the MSR workshop.

SERVICE KITS
SAVE YOU ££££'S

Save yourself a bundle with the MSR service kit! When you buy oil, filters and spark plugs together we will give you a discount on the total price.

Putoline

LUBRICANTS

With **Putoline motorcycle oil** you can find the right lubricants for each situation. A broad range of high-quality products guarantees that you can always use the correct product in compliance with the factory specifications of your machine.

In addition to engine oils, Putoline Oil has transmission oils, chain sprays, shock absorber oils, brake fluids, fork oils, coolant and many other maintenance products, which offer excellent service and protection.

EBC

CLUTCHES

from
£35

EBC CK Series clutch plates are almost identical to original equipment. The CK Series are a cork based product impregnated with aluminium particles to increase wear life and heat resistance. The material is highly compressed to avoid swell and clutch drag and is an ideal general purpose replacement material for all grades and sizes of motorcycle.

EBC CSK Spring Kits are also offered in addition to the CK Clutch Plate Kits. It is recommended that new springs are fitted at the same time as clutch plates, replacing springs that get tired after miles of heat and use. EBC CSK Spring Kits are approximately 10% stiffer than original Springs.

EBC also supply a range of SRC race kits that include Kevlar lined plates and heavy duty springs ideal for heavy sport bikes, faster riders and production based race use

CLUTCHES

from
£75

Surflex, manufacturer of performance, high torque clutch plates and kits. Their production goes back more than sixty years and their clutches cover every aspect of motorcycling, from the earliest Classic Bikes to the slipper clutches of todays modern race bikes. Designed and manufactured in Italy. They are used by most Ducati and other European motorcycle manufacturers as a stock replacement clutch.

SIGMA
PERFORMANCE

Sigma slipper clutches are intended to help motorcycles enter corners, especially on the racetrack, by automatically slipping the clutch whenever engine braking exceeds a certain point.

- Elimination of wheel hop entering slow corners.
- Improved grip entering fast corner's as the rear tyre no longer has to turn over the engine.
- Some protection against excessive over revving if the rider accidentally changes down too many gears going into a corner.

TRAIL TECH

Trailtech digital gauges suit a wide range of applications from road, race, street fighter, and off road bikes the units displays are highly visible with their easy read backlit screens. Add one of our billet cases and you've got yourself a very stylish and functional bit of kit

VAPOR

Tachometer / Speedometer:

- Vapor's large digital tachometer bar graph is easy to read.
- All Trail Tech motorcycle and ATV computers have extensive support for speed, distance, and time readouts.
- Vapor and Vector can sense both engine temperature and ambient air temperature.
- Vapor and Vector have programmable LED lights for engine temperature warnings and shift light alerts

VECTOR

Digital Speedometer:

- Vector has many of the same features of Vapor, but without the tachometer display. Vector has larger, easier to read digits.
- An accessory remote control is available for Vector. The remote places the speedometer's buttons near the handlebar grip, promoting safety and ease of use.
- Vector has a lap timer and enduro / rally features that Vapor lacks (accessory remote switch required.)

£74.99

These custom CNC Billet alloy cases greatly improve the look and functionality of either the Vector or Vapor unit. With four 12 volt led lights for indicator, neutral, oil etc. Available in Plain aluminium, anodized black or Polished.

£54.99

ACE-1500

from **£84.99**

ACE-1600

£144.99

The Acewell 37XX range includes dual sport functionality with its additional surround. It offers indicator lights for blinkers L, blinkers R, high beam, oil pressure, neutral and hazard lights. Also available separate without the speedo.

The new ACE-1500 offers all the same features as the ACE-3100 series computers, with a brand new designed shape, screen and casing. A petrol gauge feature is also included as standard. The New ACE-1600 Also offers a 50 lap timer mode, temperature gauge and a handlebar mounted remote control along with all the other features of the ACE-1500

ACE- 27xx -28xx series

Multi-functional LCD ATV/MOTORCYCLE computer includes Tachometer, Temperature meter and Speedometer. LCD Display has 2 rows digital and analogue rpm bar-graphic displays with blue LEDs backlight. Odometer and total riding times are stored in memory, even when the power is off.

Universal wheel circumference setting range: 1-3999mm.

Includes rpm sensor, speed sensor and magnet kits.

Superior build quality with CNC billet aluminium casing.

Vibration (8G) and mechanical shock (100G) tested.

Water resistant tested 100%.

EMI/EMS tested

Functions.

Bar graphic tachometer, Digital Tachometer & Warning. Temperature Meter, Speed Meter, Trip Meter, Odometer, Maximum Speed, Average Speed, 12/24 Hour Clock, Riding Timer, Total Riding Timer The speedos are available featuring various combinations of idiot lights.

The casings are available in Anodised Black or Polished

ACE -3xxx series

Multi-functional LCD ATV/MOTORCYCLE computer includes analogue and digital tachometer, speedometer, trip meter, odometer, clock, average speedometer, maximum speedometer, riding timer and total riding timer. LCD has 2 rows digital and an analogue bar-graphic tachometer displays with blue LEDs backlight. Odometer and total riding timer are stored in memory, even when the power is off. The computer always displays clock even when other functions are power off.

Wide wheel circumference setting rang: 1-3999mm.

Includes speed sensor and magnet kits.

Excellent water resistant, anti-

vibration structure and noise

immunity design.

ACE-3251 series

has additional functions of fuel

gauge, temperature display

and volt meter.

Idiot lights can be added with

an additional surround available

in various finishes

motoscope light

The motoscope light is a small, light and reliable digital instrument. It shows every measured value with high precision and features a modern design and an individual look.

The motoscope light is eminently suited to all Custom Bikes, Street Fighters, Café Racers, racing bikes and all other individually styled motorcycles.

In short, the motoscope light offers multiple functions in a small and attractively styled instrument. The billet aluminium casing is CNC-milled and therefore of the highest quality. Its surface is anodized either in black or silver. A mirror polished version is also available. The casing is sealed and protects all electronic parts against weather, water and dust.

Functions

Rev counter (LED band , numeric), speedometer, gear position indicator, trip odo, total odo, trip time, voltage, several acceleration values, max. and average values, engine-speed threshold, shift light output

£230

Motoscope fitted with Motosign

motoscope mini

The motoscope mini features a multifunctional digital instrument, which is extremely small and lightweight. The LED display is a proprietary development by Motogadget especially designed for the motoscope mini. This display represents an absolute novelty in the field of digital instruments. 251 ultra-bright LEDs form an almost rimless display area that provides for faultless readable indications. The new display is not only able to show readings horizontally but also vertically. Hence the instrument can be mounted horizontally or vertically.

The motoscope mini is compatible with most of original speedometer sensors supplied by the vehicle manufacturers. For all other cases a speedo sensor is supplied with the instrument.

Functions

speedometer, Rev counter (LED band and numeric), shift light, trip odometer, trip time, total odometer (adjustable)

The CNC-milled billet aluminium casing is available in black anodized , silver anodized and mirror polished

£210

motosign & motosign mini

The motosign is an indicator lamp panel that fits perfectly to the Motoscope light or motosign mini in terms of size and design. The billet aluminium casing is CNC-milled and the surface is anodized either in black or in silver. Also available in mirror polished. The casing is sealed and protects all electronic parts against weather, water and dust. The ultra bright LEDs are correctly adapted to the vehicle voltage.

Motosign £110 Motosign mini £73

Motoscope mini fitted with Motosign mini.

TransLogic

Push button gearshifter - both up and down function.
Ultra compact design.
Lightweight servo design.
No air bottles required.
Unlimited number of gear shifts.
Micro controlled - simulates rider gear shift speed and action.
Handle bar mounted buttons brackets.
AST IntellishiftTM quickshifter compatible.
Full/part throttle shifting.

GIZZMO

£110

The Gizzmo Dual Stage shift light
utilizes a polished anodized aluminum casing to host a matrix of ultra-bright LED's. The two-color LED matrix provides an unmistakable indication as to which rpm stage has been reached. The first stage illuminates the yellow ultra-bright center LED. The second or final stage illuminates the outer ring of 6 ultra-bright LED's signaling the change point.
The Gizzmo dual stage shift light only requires a basic 3-wire installation, and uses a simple two-button configuration for its operation.

REAR SETS

Adjustable rear sets can make all the difference to the control and comfort of riding sports bikes, allowing the bikes foot pegs and controls to be set up to suit the rider

GILLES TOOLING

VCR Rearsets

- CNC machined from aircraft spec' alloy.
- Fully adjustable – Rotary / Slide / Lever
- Vented carbon heel plates included.
- Precision bearing mounted lever arms.
- O/E brake light switch retained.
- All linkages / bolts / hose extensions included.
- Anodised colours - Gold or black or mixed
- Many kits can be converted to reverse shift.
- TUV / ISO 9002 approved.
- All spare component parts available.
- Full fitting instructions included.

GILLES ADJUSTABLE REARSETS

Fully adjustable, precision made, replacement footrest kits, made to the highest standards.

As 31 Gt Rearsets

- CNC machined from aircraft spec' alloy.
- Fully adjustable
- Carbon heel plates included.
- Precision bearing mounted lever arms.
- O/E brake light switch retained.
- All linkages / bolts / hose extensions included.
- Anodised colours - titanium, gold or black.
- Many kits can be converted to reverse shift for racing.
- TUV / ISO 9002 approved.
- All spare component parts available (With individual part nos).
- Full fitting instructions included.

As an add on, folding footrests are available to fit to the pillion footrest hangers and match the AS31GT style footrests.

Sets from
£285

RIZOMA®

Rizoma rearset kits, made of the finest billet aluminium alloy. Especially designed for sports, characterized by an unique lightness and resistance to breaking. Various racing tests have revealed the necessity for vertical and horizontal adjustment, to give maximum comfort and ease of operation to the rider. Mechanisms mounted on bearings assure a precise gear change and braking action.

£3.69

OXFORD

PRODUCTS

Essential Rider Equipment

Early morning, late night, winter and wet weather riding can lead to very cold hands, even with the best gloves. This can cause a lapse of concentration and dexterity. The Oxford Hot Grips replace stock grips and connect to the battery. They heat up to the desired temperature, set from a digital handlebar mounted control unit. A commuting essential.

£60

Flame grips available in the colours shown

£6.99 pair.

LEVERS

ASV levers feature an adjustable span. By simply adjusting a wheel on the lever, the reach (distance from the handle bar to the lever) can be adjusted to accommodate the smallest to the largest hands.

ASV Levers

Made in the USA, all ASV levers feature a special pivot design that allows the lever to fold out of harms way in the event of a tip-over of the bike. Instead of bending or breaking, ASV levers simply pivot outward when impact occurs, and spring back instantly.

All ASV levers use the same high quality components including 6061 grade alloy blade, stainless steel pivot bearings, and stainless steel fasteners.

ASV levers are also completely rebuildable and serviceable with no special tools required.

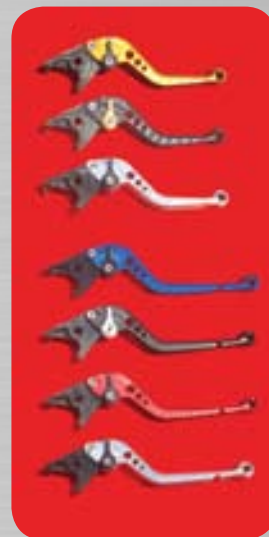

- Choice Of Standard Or 'Shorty' Length
- Colour Choice: Black, Gold Or Raw Alloy (Silver)
- CNC Machined From Billet 6061 Aluminium Alloy
- Unbreakable Design With 5-Year Guarantee
- Over 3" Of Reach Adjustment Range In 100 Increments
- Shot Peened, Anodised Matte Finish With Laser Engraved Asv Logos, Or Raw Polished Alloy
- Completely Rebuildable

Pazzo Levers

Engineered, designed and manufactured by Pazzo Racing these sleek looking performance levers deliver great performance and style to any bike. Offering light weight, anodized colors, long and short designs for various model fitment.

- CNC Machined From Billet 6061-T6 Aluminium
- Fully adjustable
- Stainless steel fasteners and cadmium plated custom springs
- Come in a variety of mix n match anodised colours

RIZOMA®

Thorough research has proven that at high speed the air pressure force on the lever puts the circuit under pressure rendering it inactive. Having been subject to long-term studies in a wind tunnel, Rizoma levers have been designed in order to make it less affected by air pressure, even at a very high speed. The precise ultra thin front lines, as well as the shape, assure better aerodynamic properties and grip.

The Rizoma lever is characterised by an ultralight weight thanks to its particular shape with hollow spaces left for this purpose.

£216 pair

Quality machined billet levers by Rizoma offer a wide range of adjustment and features over stock levers

The levers are created in line with the latest technology: a broad range of adjustments, including movement on the bearings with return springs, makes it possible to improve their function, reliability and durability. The articulated joint allows the lever to fold in the event of a fall avoiding damage to the lever and mechanism.

GILLES TOOLING

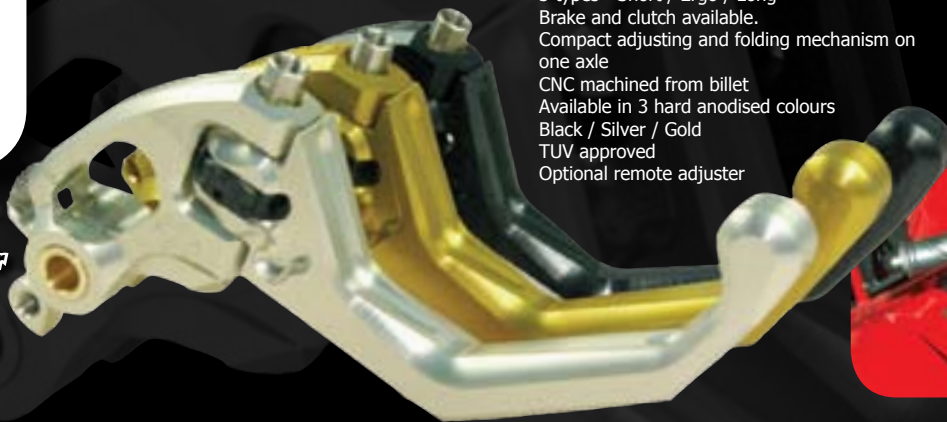

GILLES EXTREME FOLDING LEVERS

Precision made, fully span adjustable, folding, brake & clutch lever kits which, if required can be fitted with an optional remote cable adjuster. TUV safety approved, with a folding feature to help prevent breakage on impact and span adjustable to suit different hand sizes.

GALFER

Galfer, innovators in braking technology are the company responsible for the original Wave® disc design. Galfer Front wave discs have high carbon content stainless steel rotors and alloy carriers, with an anodised black finish. An optional chromed alloy carrier is also available.

Wave® discs are a direct bolt on replacement for original discs, offering several benefits over conventional designs.

Superior friction properties.

Significantly lighter reducing unsprung weight and gyroscopic effect.

Wave® design offers a self-cleaning action. Shape allows expansion and contraction with less tendency to warp and a lower running temperature of the whole brake system.

A highly technical look is achieved.

from **£190** each

For road or race, increase stopping power and improve the handling of the bike. Aftermarket replacements discs or upgrades to stock for added performance.

DISCS

BRAKING

Braking Stainless steel Wavey rotor replacement discs, give increased performance and style over stock rotors.

- Better friction coefficient
- Better heat resistance
- More initial 'bite'
- More feeling on the lever
- Better handling
- Less weight

from **£180** each

ARMSTRONG BRAKE DISCS

BRAKING

Serious performance mods for the serious rider. One the most important components when it comes to the handling a bike. We've come a long way since the invention of the wheel!

WHEELS

Braking 9-spoke wheel

The 9-spoke wheel from Braking was introduced to revolutionise the way the disc is fitted to the wheel. They have in turn, reduced the number of component parts and, therefore increased rigidity and performance.

This ingenious design brings the weight of the wheel closer to its axis, produces a lower gyroscopic effect, thus improving your bike's handling, stability, and cornering

High quality front discs - giving incomparable braking performance - are included along with pre-fitted bearings, cush drive and rear sprocket.

Just add tyres and your machine!

From **£890** pair

The laws of physics show that the heavier an object is, the more energy is required to move it and also when a heavy object is travelling, it will require greater effort to change direction or stop it.

Galespeed wheels are made in Japan, from forged aluminium. The method of manufacturing results in a much stronger material than used in the original equipment cast alloy wheels and therefore allows for thinner rim construction, which effectively reduces the wheels weight whilst retaining the necessary strength for road use

TAIL TIDIES

The Motrax Rrsend universal number plate bracket

is designed to accommodate the majority of number plate sizes, allowing the standard mounting unit to be removed or cut back. The bracket is ideal for using with aftermarket undertrays, which are restrictive when mounting indicators etc.

The result is a much sharper look to your rear end! The bracket has also been designed so that 'universal' indicators can be mounted to it. The indicator mounting points are adjustable to allow for different sized number plates, this allows you to keep your rear looking good to all those envious people that are left in your wake!!!

£15.99

Also Available with adjustable height and angle license plate position bracket. With multiple mounting holes the Adjustable Rrsend is easier to fit and keeps your rear looking sweet at any angle!

£19.99

with adjustable license plate bracket

RRSEND BIKE SPECIFIC BRACKET

- Specific fitments for selected bikes
- Designed to hold aftermarket indicators
- Easy bolt on installation
- Replacement number plate light where required

Individually designed to replace the plastic travesty original fitment and show off the lines of your bike, they give the facility to refit number plate and indicators, giving a lean, sleek look to your rear end.

Prices from £26.99

The R&G Licence Plate Holder is made from lightweight aluminium and replaces the very large, original plastic licence plate holder. The licence plate holder comes with all necessary holes drilled and where necessary, it comes with a neat little built-in licence plate light and optional red reflective tape.

REVERSE RETRO

RIZOMA produce the best quality mirrors you can put on your motorcycle. Beautifully designed and CNC crafted from solid billet alloy, finished to a very high standard.

Most Rizoma mirrors feature convex glass, blue tinted mirror lens with the exception of Tomok & Circuit styles fitted with a standard Blue tint mirror lens. The new Elise mirror features an anti glare amber mirror lens.

With many different styles and adjustments Rizoma mirrors suit most applications from sports to customs.

Some Rizoma mirrors require additional bike specific mounting adapters please call us for model and fitting options

RIZOMA 

MINI BAREND MIRRORS

Finally mirrors that show you more than your shoulders! Machined from billet aluminium Motrax Mini Barend mirrors are a high quality convex mirror for a wide angle view. Mounted in a vibration resistant anodised frame. The 3" diameter Mini mirror includes bar ends to fit standard 7/8" diameter bars, or will clamp around most standard bar ends.

MIRALLYS ALUMINIUM REPLACEMENT MIRRORS

Stylish, high quality replacement mirrors by Motrax available in Black, chrome or aluminium finish.

Universal fitting.

Position locking allen screw on back of mirror.

Blue shock resistant tinted lenses. Lightened stems

£50 pair

OBERON

CREATIVE PRECISION...

Universal bar end mirrors, end mounting or top mounting due to the unique design. They are fully adjustable, lock in any position with integral grub screw. 6mm diameter lens. Designed to fit most bikes.

Each set contains one set of weighted bar ends, one set of anodised mirrors and one set of anodised stems. Available in silver or black. Other colours are available by special order.

FORK SPRINGS STEERING DAMPERS REAR SHOCKS

Progressive Fork Springs.....Why?

Adding progressive fork springs to a bike is one of the easiest and most cost effective way to drastically improve the handling of any motorcycle.

Improved Braking

The progressive winding ratio of the spring gives greater resistance the more it is compressed. This helps reduce dive under braking and improve braking distances.

Improved performance

Small bumps and irregularities in the road surface get absorbed immediately, large bumps or holes are intercepted by the 'more rigid' part of the spring. This results in perfect harmony between control and comfort.

No resonance

A linear spring has a specific frequency and therefore, could resonate at that particular frequency. Resonance is not only very annoying it can also be dangerous. Progressive springs do not have a frequency so therefore never resonate, an obvious difference!

Self Adjusting

Progressive springs adjust themselves instantly to changing circumstances. When carrying a passenger, luggage or even changes in the amount of fuel in your motorcycle, the spring provides more resistance ensuring the best performance automatically.

PROGRESSIVE SPRINGS ARE AVAILABLE FROM THE BRANDS BELOW

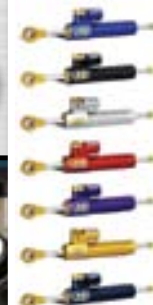

CNC machined aluminium and highgrade aluminium alloy construction. Progressive Hyperpro RSC (Reactive Safety Control) steering damper. Due to speed-sensitive damping, fast and sharp blows are intercepted more effectively, and will not affect steering behaviour at lower speed.

22 position adjuster

Prices from

£170

Sprint dampers cover a wide range of applications including tank mounted 916 style, side mount and direct replacement fitments. They feature 13 positions of adjustment, are fully serviceable and are available in a wide range of anodised colours to suit the colour of your bike. Fitting kits are available for a vast array of models from old to new.

HYPERPRO[®]

Racing Suspension Technology

Produced on precision CNC machinery, Hyperpro's range of shocks offer fully adjustable pre-load adjustment, and all models other than the Emulsion range offer high / low speed compression and rebound damping. The top spec models have all the advantages of low stiction carbon nitride coated 16mm rod, CNC machined 7075 aircraft alloy body, optional integrated hydraulic spring preload adjuster and shock length adjustment, for easy ride height changes. All shocks are built to order using the riders' individual requirements and come fitted with progressive springs and a complete user friendly set up manual.

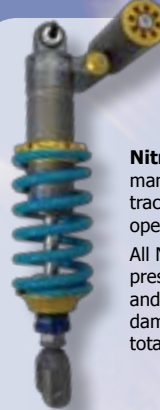

Prices from

£350

NITRON[™]

RACING SHOCKS

Nitron Shock Absorbers combine outstanding performance with exquisite product design. Whether for road or track, NITRON have the suspension kit that offers fade free operation lap after lap.

All NITRON shocks are gas monotube shim type with a high pressure gas charge. Couple this with a large piston area and an all alloy construction and you get an ultra low friction damper with excellent heat dissipation properties, ensuring total reliability and fade resistance.

Prices from

£350

suspension

WP

WP Professional Road & Racing Suspension has a winning reputation and is generally considered one of the best motorcycle suspension companies around.

Producing a wide range of highly sophisticated, advanced suspension products for road, off road, race and track. WP Suspension's superior quality shock absorbers, front forks, steering dampers and replacement springs are all designed to give increased performance, comfort and safety for your bike.

Supersprox Tri-Metal sprockets are among the most technological advanced sprockets in the world. The concept is a combination of a long lasting steel outer with a lightweight aluminium centre that utilises the best of both materials. The durability of steel and the weight saving of alloy.

Quality Steel, replacement sprockets

CHAIN & SPROCKET KITS

AFAM has been producing Motorcycle transmission parts for 24years. They have established a reputation for quality and technical expertise that is respected worldwide.

AFAM is the market leader in Japan and France for aluminium and steel sprockets and motorcycle chains. They are the only aftermarket manufacturer to use induction hardening on steel sprockets. Their reputation for quality is such that they have been chosen as the OEM supplier for many of the top bike manufacturers and race teams.

AFAM Chain and sprocket kits include a steel front sprocket with a choice of steel or alloy rear sprocket. A gold X ring chain with strength and pitch suitably matched for the machine is supplied as standard. Coloured chains are also available.

Scott Oiler Universal VSystem

The Scottailer VSystem is the latest edition of the market-leading range of vacuum-operated Scottailer chain lubrication systems. The kit gives a range of approximately 400 - 800 miles between refills of the RMV (Reservoir Metering Valve), depending on the flow setting. The kit has a range of fittings suitable for most bikes, (non standard adapters are available FOC from Scottailer), and includes a 250ml bottle of Scottoil, which should be enough for approximately 2500 miles of lubrication.

£84.95

Scottailer®

Dual Injector

The Dual Injector delivers oil to both sides of your chain simultaneously. This product is an add-on to the vSystem and Mark7 range of kits.

£24.95

Magnum HCR Kit

This addition to the VSystem and Mark7 Universal Kit increases oil capacity by eight times, from 50ml to 400ml, and should give you 4000 to 6000 miles between refills (depending on your flow rate setting). This is an ideal addition for any biker who will be travelling long distances, or for any biker who just can't be bothered refilling the system very often!

£39.95

Touring Kit

The ideal kit for long distance bikers. The Touring Kit has all the advantages of the VSystem and Universal Kit with an increased oil capacity of seven times, enough for between 4000 and 6000 miles riding, depending on the flow rate setting. The High Capacity Reservoir mounts behind the rear number plate and the RMV (Reservoir Metering Valve) can be attached directly to the side of it, or mounted remotely if preferred.

£119

Scottoil 500ml refill bottles & spout.

SHOCKTUBE

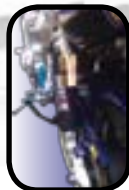

BATTERIES &
SHOCKTUBE

THE BEST BATTERY FOR YOUR MOTORCYCLE!

YUASA

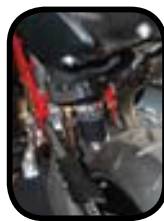

Yuasa are the leading designers and manufacturers of quality automotive batteries. They are also a world leading supplier of OEM batteries to most of the leading brands of motorcycle manufacturers. So if it's time to replace your battery be assured that by fitting a Yuasa battery your fitting the best.

The Shock Tube is a high impact waterproof vented tube made from top quality bonded 100% CR Neoprene which is double lined with stretch nylon on both sides.

Completely enclosing the motorcycles rear shock absorber and spring, Shock Tube prevents damage from road salt, water spray, stone chipping, dust and dirt.

The Shock Tube can be fitted to most motorcycles quickly, without the need to remove the shock absorber!

Continually protecting the rear shock absorber and spring, while still maintaining the condition of the shock for a substantially extended period of time, throughout the life of the motorcycle. Give your bike the best shock protection available today.

£69.99

Front or rear paddock stands from Bike it make servicing easier and safer.

from £25

£89.99

abba

Motorcycle Equipment

No more hassle working on bikes with no centre stand or struggling with the awkward, tedious and risky balancing act required to use a conventional paddock stand on your own. The Abba Superbike Stand is a total one person operation sports bike stand that fits onto the swing-arm pivot of the motorcycle. The stand is fitted to the bike when the bike is leaning on its own prop stand, so you do NOT have to hold the bike up at any time while fitting the Abba superbike stand unlike conventional paddock stands, the bike can then be lifted using the integral telescopic extension lever.

Abba stand fitting kits from £16.99

MOTRAX

Strong and durable front or rear paddock stands from Motrax.

from £35
